

Muhammad Gymnastiar Nikkei Almada

Bandung, West Java | +628139936391 | nikkeialmada@gmail.com |
<https://www.linkedin.com/in/gymnastiarn/> | <https://portofolio-nikkei.vercel.app/>

Mining Engineer from Institut Teknologi Bandung with professional experience in mine planning, geotechnical analysis, and mining operations. Experienced in pit, road, and dump design, operational performance analysis, and geotechnical assessment using Surpac, Deswik, Datamine, and other mining software. Strong interest in mining technology, with experience developing web and mobile applications to support mining data analysis and operational decision-making.

EDUCATION

INSTITUT TEKNOLOGI BANDUNG

AUG 2020 – AUG 2024

Bachelor of Mining Engineering, 3.11/4.00

Bandung, Indonesia

- *Successfully designed optimal pit layouts, developed mining schedules, and conducted hydrological and economic analyses for a feasibility study of a laterite nickel mine.*
- *Successfully designed the optimal underground mine layout, developed the mining schedule, and prepared the reclamation section for the feasibility study report using the sub-level stoping method in a gold mining project*

SMAN 4 SUKABUMI

JUL 2017 – JUL 2020

Natural Science

Sukabumi, Indonesia

- *Top 1st ranking from over 230 students for academic assessment in Mathematics and Natural Science*
- *4th Place OSN Fisika, Kota Sukabumi*
- *2nd Place English Debate Competition at SMA Hayyatan toyyibah, Kota/Kabupaten Sukabumi*

WORK EXPERIENCE

FOREMAN MINING ENGINEER

MAR 2025 - PRESENT

PT Adhi Kartiko Pratama

- *Conducted block model validation, long-term pit design, pit optimization, and mine scheduling for a prospective mining project under acquisition evaluation by PT Adhi Kartiko Pratama, supporting management's technical due diligence and investment decision-making.*
- *Leveraged strong field-based mining sense combined with rigorous spatial and economic analysis to design optimal layouts for pits, roads, dumps, and construction areas — utilizing a comprehensive macro mine-planning software suite (Surpac, Deswik, Datamine, AutoCAD, 12D) and optimization algorithms to maximize operational efficiency and production readiness.*
- *Developed a web-based mining production monitoring dashboard using Flask & MySQL, featuring real-time equipment KPI tracking (PA/MA/UA/EU), ore/waste production analytics, and interactive strip ratio visualization.*

DESWIK.CAD TRAINER (Freelance)

SEP 2026 – PRESENT

Aksara Karir – Mining & Geologi Training

- *Design and deliver 3-days intensive Deswik.cad training program for nickel mine planning, covering UI fundamentals, block model workflows, pit/dump design, haul road design, surface reconciliation, catchment analysis, and section/layout plotting.*
- *Teach participants ranging from first-time Deswik users to practicing mine planning engineers seeking to upskill, translating field experience into structured, hands-on lesson material.*

SOLO DEVELOPER – MINING TECHNOLOGY PROJECT

JULY 2026 – PRESENT

Independent

- *Designed and directed development of GEORIVAL, an Android application digitizing exploration and mine planning for a nickel laterite operation — 2D block model visualization, drill hole management, GeoPDF mapping, and field productivity tools. Engineered the reserve reporting logic (domain-specific Recovery/Dilution, cut-off grade classification, Stripping Ratio) to standard mining engineering practice, validated against real operational data.*
- *Built an end-to-end geospatial pipeline integrating industry-standard data exports, historical satellite imagery, and automated grade-tonnage reporting, including a large-scale point-cloud processing pipeline (80,000+ points) for accurate section profiles.*

PT LAPI ITB

SEP 2024 – MEI 2025

Geotechnical Division

- *Successfully determined the most optimal slope from the single slope analysis by considering various geotechnical analyses in determining the slope height and angle for the mine design to be used in the Life of Mine in preparing feasibility study reports for limestone, claystone, laterite and silica at PT Indocement Tunggal Prakarsa site Tarjun.*
- *Successfully conducted the geotechnical section of the feasibility study, encompassing drilling data interpretation, slope stability analysis, and mining recommendations.*

HONORS & AWARDS

MINING GAMES 2022 – 2023 INSTITUTE TEKNOLOGI BANDUNG

FEB 2023

Getting 1st Place at Mine Evacuation Rescue Competition

- *successfully evacuated workers from a mining accident by providing first aid*
- *Provided first aid to workers who suffered from a broken bone by tying a splint to the leg*

CERTIFICATION & TRAINNING

MASTER PYTHON BY BUILDING 100 PROJECTS IN 100 DAYS.

LEARN DATA SCIENCE, AUTOMATION, BUILD WEBSIRES, GAMES and APPS

SEP 2026

master the Python programming language by building 100 unique projects over 100 days

MANAJEMEN RISIKO GEOTEKNIK, STUDI KASUS KEGAGALAN GEOTEKNIK DAN PEMBELAJARAN IMPLEMENTATIF

AUG 2026

Developed knowledge in geotechnical risk identification and assessment, slope stability analysis

MINEPLAN BATUBARA: MINESCAPE & SPRY

JAN 2025

Geological Modeling & Resources Estimation, Mine Design, Optimizing Pit Limit and Mine Shcdulling

ADDITIONAL SKILLS

- **Language:** Bahasa Indonesia (Native), English (B2)
- **Software:** Microsoft Office, Google Workspace, AutoCAD, Arcgis, Datamine, Dips, Slide 2, Phase 2, Kazamaru, Deswik, Surpac, Rocplane, Wedges, Minescape, Whittle, Minesched, Spry, 12D, WMS, Surfer.
- **Competencies:** Public Speaking, Leadership, Teamwork, Communication, Critical Thinking
